

At Gozakura Juhey, we produce a variety of tatami omote, carefully crafted according to the length and quality of the igusa.

Our range includes Muichimotsu, woven exclusively from the finest long igusa; Musashi, a durable tatami omote made from shorter igusa commonly used for standard-grade products; Higo Meseki, featuring an innovative woven design; and Water Jewelry, which offers excellent water repellency.

For retailers, businesses, and other professional customers interested in carrying our products, please contact us through our inquiry page.
